QQQ Follow-up

In examining some other charts, these long duration cycles are most often associated with huge V-bottoms.

Subject: **QQQ Cycles - Look Out**

Based on 900 bars of QQQ cycle data Highs, we are potentially in for a loooooong duration cycle (possibly 100+ trading days) starting (again potentially) very soon; or something fundamentally is about to change in regards to recent QQQ historical cycles. If the former is true, this extra-long cycle (High-High) would suggest a nice, sustained trending market (up or down). I'm defining my cycle highs using the previous 27-bar criteria. We'll see.
